

Physics and AP Physics 1 may be taken once you've completed Integrated Science and as long as you will be enrolled in Algebra II or higher math

AP Physics 2 is an Algebra-based continuation of AP Physics 1 and is a great for students interested in any number of careers. **AP Physics C** is a Calculus-based course which (if the exams are passed) can earn you ten semester hours of college physics credit for careers such as engineering, physics and pre-med majors!
