

*VLA Physics things to do (things on your plate) as of Wednesday, September 9, 2020*

**To do today (Wednesday)**

- 1) **Complete the graphing pre-assessment today by 11:59 PM.** It's very important you do this today!
- 2) Complete any of the things you did not do last week if I messaged you.
- 3) If you didn't watch my video on Academic Integrity and answer your assigned scenario on that, **this needs to be done TODAY** as we'll be discussing these during our synchronous Google Meet on Thursday.

**To do on Thursday**

- 1) Attend the Google Meet at 2:30 PM and participate verbally!

**Friday**

- 2) Complete the Physics Mindset activity by answering the questions in the document and watching the video linked in the document. We'll talk about this Monday in our Google Meet, so it's **due Sunday, 9/13 at 11:59 PM.**

*A look ahead* – we'll be getting into the Graphical Analysis program and having a graphing lecture next week, and a lab you'll do at your home collecting data. We'll be getting to our first quiz the week after that.
